

SeeOnSea

**The global Network to
share sea, coastline and
earth observations**

PRESS KIT

FOUNDERS' WORD

Mountain and Sea adventures lovers, our team was formed around the idea of creating a global network for sharing observations.

SeeOnSea is a simple and innovative concept. With it, **we hope to sensitize a very large public about the discovery and protection of the nature.**

So, through partnerships with various organizations, we will share their values focused on the learning and the protection of natural environments.

Why SeeOnSea ?

Vence 06, Alpes-Maritimes, France

+ (33) 6 09 48 21 38

<https://www.seeonsea.com/>

SeeOnSea's ambition is to become the Global Network for sharing sea, coastline and earth Observations.

SeeOnSea is unique in targeting the general public as well as marine and tourism professionals.

With SeeOnSea Observations are instantly shared, visible for free and without borders!

Our objective is double:

- Show the richness of the world through its biodiversity;
- Disseminate knowledge to raise public awareness of the damage caused by pollution in order to rectify behaviour, encourage the ecological transition and promote citizen mobilisation.

"Better understand to better protect our environment"

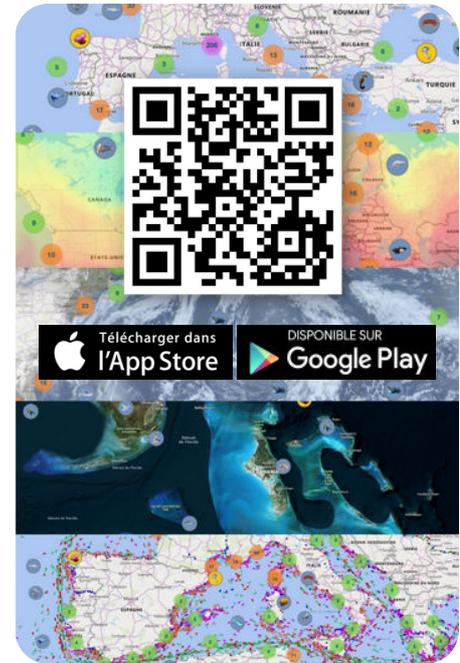

APP

Imagine a map where Observations are placed with the GPS accuracy.

You could confirm an Observation reported by someone else.

You could even complete your knowledge about seas and oceans.

The SeeOnSea app offers much more!

5 Observations types are possible :

- Fauna
- Flora
- Natural phenomena
- Human footprint
- Remarkable sites

Discover its many features on <https://seeonsea.com/#/public>

SUCCESS STORY

Laureate of the TravelCamp Sud prize for innovation in tourism in March 2022, SeeOnSea is having one success after another.

Since August, we've had the support of the Tourist Office Federation.

In September, SeeOnSea was invited to appear on BFMTV's "Planète locale" programme.

Every day, more and more of you around the world are sharing Observations.

Join our partners:

- Objectif Gard believes in SeeOnSea and supports us every day with its 300,000 readers;
- Blue-Finance has believed in SeeOnSea from 2021 on several marine reserves in Belize, Dominican Republic, etc.

DATES

SeeOnSea Pro	SeeOnSea General public	Mobile versions	New products and services
August 2021	December 2021	June 2022	September 2022

SeeOnSeaPro

You are looking for a professional, modern and scalable tool, you have seen SeeOnSea and you wonder if it can be adapted to your activity.

With SeeOnSeaPro everything is possible :

- Add your own features ;
- Develop additional applications;
- Adapt the database by integrating new information (acoustic, seismic, ...);
- Integrate new species or new types of observations;
- Adapt presentation and display.
